

# Spinal Cord Injury Services

## **PERSONS SERVED**

Individuals seeking a comprehensive rehabilitation program provided by an interdisciplinary team of professionals. Services are available to individuals 15 years or older who are medically stable.

## **PROGRAM GOAL**

To achieve the individual's highest attainable functioning level through team involvement of the patient/student and his/her family. The program emphasizes treatment planning and intervention to teach self-sufficiency, responsibility for managing personal and physical needs, and vocational preparation.

## **PROGRAM FEATURES**

- Academic Education
- Driver Evaluation and training
- Equipment evaluation, prescriptive training
- Evaluation and training in computer technology
- Home visits
- Individual and group counseling
- Medical and psychological treatment
- Family education
- Physical and occupational therapy
- Pre-vocational training
- Recreational programs
- Rehabilitation engineering
- Vocational evaluation
- Vocational training

A comprehensive rehabilitation program offers the opportunity to interact with other persons with spinal cord injury at various levels of rehabilitation.

The Family education center encourages family involvement in the rehabilitation process. Located within the health services setting, the center targets spinal cord, stroke and head-injured students and their families.
